## **SB CONSTRUCTIONS**

### **COMPANY PROFILE**

**SB Constructions.** Based at **A2, RPS Omaxe Green valley Sector 41-42, Faridabad, Haryana-121003**, came into existence in Dec 2012 by Mr. S. B. Gurjar (B.E. Civil & MBA) as Proprietor. Now our new Registered address is FF-11, Green Valley Plaza, RPS Omaxe Green Valley, Sector 41-42 Faridabad (HR)-121010.

We, at SB Constructions, are in the process of working towards our goal of the launch of our new project of Storm & Sewer water lines with IL & FS Engineering services Gurgaon. And LNT CC-27 Delhi IN initial stage. During the current days we are perform so many projects of shoring work/soil retention system with reputed clients like M3M, Emaar, Tata Projects, Bayaweaver Limited, L&T Limited, Brookfield, Ajnara, Gulshan Homz etc.

After That also in other activities like piling, pipe line etc. We have been worked for so Many clients as listed in our profile.

Our equipment strength consisting of the following:

- 4 TMR Piling Rigs of boring capacities of 45 meters depth and 300 to 1200 mm Dia.meter.
- 1, Hydraulic Rotary Rig Machine Zoomlion ZR-150 Make ACE.
- 1, Hydraulic Rotary Rig Machine HR Mait 180 and Other Hiring Rigs in contact on rental basis.
- 2 Nos.. ROC Drilling Machines for soil & Rock anchors.
- 1500 Mt Steel Girders for shoring works.
- One set of Pile Load test up to 1800 Mt Capacity Complete with 50 secondary girders
- 2 Hydra Cranes with 12 Ton capacity of each.
- 6 Vertical pumps for bentonite slurry shifting.
- 12 Nos. Polymer Pumps.
- 20 Welding rectifiers with all accessories.
- 8 Steel Tank with 40 cum capacity of bentonite mixing Each.
- Six Grouting pump capacity 25 kg/sq.cm and depth up to 25 m.
- Dynamic Jacks 350 Ton 2 Nos., and Six Power packs
- Power pack & Jacks for soil anchoring 5 sets.

- Other necessary small tools as slings, D shackles, belts and wood cutting machines.
- 1 Scorpio and 10 bikes as conveyances facilities.
- Having own office FF-11 at Green Valley, Faridabad (HR).

Operated and Maintained by a skilled and dedicated workforce of operators and technicians.

It gives us a lot of pride and pleasure today to state that we have now grown to be the single largest Contractor of storm water line in IL&FS. We are also measure contractor for shoring work in M3M and Emaar Gurgaon. Our clientele includes CPEPL, Lanco Infratech Ltd. and IL&FS Engineering Services, L&T, RVAG, Pioneer, SPML Infra Ltd., GR Infraprojects Ltd, CEC, Capacite Infraprojects Ltd. and AVJ., Tata Projects Ltd, Emaar MGF Land Limited, Bayaweaver Limited, Candor, M3M Gurgaon, Supreme Constructions ETC. We are the leading contractor in Delhi NCR for soil retention system. The details of some of our major projects are tabled here below for your references:

114	Larsen & Toubro Ltd.	Asset Area 13, Hospitality District, Aerocity, New Delhi	Executions of inclined soil anchor, rock anchor works (various capacity anchor is 50T, 60T, 65T, 90T) with labour, plant, machinery and material	245.878252	01.10.2018	Ongoing
115	Manglam Multiplex Private Limited	65 th Avenue Building work project	65 <sup>th</sup> Avenue, 16.50 M deep shoring work at Gurgaon sector 65	4.54300	11.10.2018	Completed
116	Eldora Constructions Pvt. Ltd.	M3M India. Pvt. Ltd. Marina sierra, sector 68, Gurgoun.	M30 grade RCC cast in situ vertical pile as per IS 2911 (Part 1, Section 2) with 450mm Dia.meter and 12 m depth below cut of level	6.18320	30.11.2018	Ongoing
117	Manglam Multiplex Private Limited	65 th Avenue Building work project	750mm Dia. RCC Pile 72. Nos.. 12.5 m deep each. 150mm Soil anchors (85T capacity), waler beam and stressing. Soil strenthning work by 75mm pressure grout pile	118.00007	03.12.2018	Ongoing

118	Capacite Infraproject Limited.	Construction of Tower-11 and Multi Level Car Parking,	Shoring with ISMB-450 Girders, with two layer of anchor 150mm Dia. 16m. deep 3m c/c, with two Nos. ISMB 200 Girder walers.	111.39200	15.12.2018	Ongoing
119	Bayaweaver Ltd. & Leigton India Contractors Pvt. Ltd.	OMG, Sector-129, Noida, UP	Borring, Driling, Installation & Testing Piling work	311.00000	28.12.2018	Completed
120	Prompt Engineering Pvt. Ltd.	Corner Walk, Situated at sector 74, Gurugram, Haryana.	Design And Build shoring system for soil stabilization by Soil Nailing work	151.06000	15.01.2018	Completed
122	Lavish Buildmart Pvt. Ltd.	“Commercial Project” Situated at sector-73, Gurugram, Haryana.	Soil stabilization work by 100mm dia Soil Nailing	60.50000	21.01.2019	Completed
121	Mangalm Multiplex Private Limited.	65 <sup>th</sup> Avenue, sector 65 Gurugram, Haryana. Amendment No-1	Shoring with RCC 750mm Dia Pile with anchor	100.04385	13.03.2019	Completed
122	Olive Realcon Pvt Ltd	M3M Trump Tower Project Building work	18 m deep shoring work by 600 mm Dia. contiguous piles and soldier piles shoring work, nailing and shotcrete work.	253.98452	05.03.2019	Ongoing
123	Melco India Pvt. Ltd.	DIS-NTPC Dadri.	Pile load Test.	27.50000	14.03.2019	Ongoing
124	Heritage Infraspac India Pvt. Ltd.	BHEL, Sector16A, Noida.	150mm dia soil Anchor by ROC/Conventional method	30.60000	01.04.2019	ongoing
<b>Total</b>				<b>9545.276941</b>	<b>Lacs</b>	

We take extreme pride in the fact that in all the above mentioned projects which include Pile load test , Station Building DMRC , Soldier Piling works, Shoring with piling and shotcrete and Sewer and Storm water line alongwith EPC contract for civil engineering job for road widening at Gurgaon, Delhi , Haryana and MGF Emmar Reservoir UG Tank, Screen chamber and sumpwell work, soil retention up to 16.5 m deep with anchoring , DI Water line work etc. we have been able to achieve complete customer satisfaction by delivering works within budget & schedule while conforming in totality with the Quality & SHE standards of DMRC , HUDA , DJB, PWD , CPWD and SEZ Projects which are the current benchmarks for any Construction Project in India..

We can therefore offer our services to you in the following areas of works where we provide a complete package:

- i. **Execute pile load test of any of piles.**
- ii. **Installation of Bored Cast in Situ Piles and Soldier piles by Hydraulic Rotary and TMR Machine.**
- iii. **Manufacture of Reinforcement as per drawing and execute all type of RCC Works.**
- iv. **Preparation & Laying of Storm, Sewer and Portable Water lines (With or without pipes).**
- v. **Fabrication & Handling of steel structures.**
- vi. **Any type of shoring works with Secant piles, contiguous, soldier and sheet piling with anchoring and Nailing and shotcrete with and without Materials like with fleet up to 1500 MT, ISMB 500 Girders.**

A brief writes up describing the technical aspects and detailing our responsibilities for the above-mentioned items of work follows:

• **Execute Pile load test and submitting of reports:**

We are able to execute pile load test as per prepared drawing layouts and make a platform by secondary girders with main girder and placing the jacks on prepared pile head of required capacity, after that placed the kentledge loading by concrete blocks with the crane and hydras.

After loading the platform by required loading we are calculated the load chart and accordingly we loaded the pile as per IS Code requirements then taken all reading and plotted the graph for collected datas.

• **Installation of Bored Cast In Situ Piles and Soldier piles**

All piles are installed by TMR, DTH and Hydraulic Rotary Piling Rig.

The works comprises mainly of the following steps:

- (a) Drilling of bore holes of required Dia.meter
- (b) Insert temporary casing
- (c) Lower Reinforcement Cage.
- (d) Flushing of bore.
- (e) Pouring of Concrete as per approved Design Mix.
- (f) Disposing of Muck / Bentonite etc.

Equipment and Accessories required for Piling are detailed below:

- (a) TMR, DTH and Hydraulic Rotar piling rig with all accessories
- (b) Temporary casing pipe

- (c) Bentonite Mixing Set-up comprising of mixing tank and pumps
- (d) Tremie pipe of 200 or 250mm I.D. min along with Hopper
- (e) Testing Apparatus
  - Measuring cylinder,
  - Mud Balance Hydrometer
  - Marsh cone
  - Weighing balance
  - Hot plate
  - pH papers

Sodium based bentonite will be used with pH of Fluid between 9.5 and 11.5. Bentonite powder shall conform to requirements given in IS: 2911 (Part -1/Sec -2). All batches of bentonite powder delivered & suspension fluid made there from shall be tested to satisfy requirements failing which they shall be rejected.

Bentonite powder shall be mixed with clean water to make a suspension of density as specified. The suspension shall be regularly tested to ensure its suitability for use as drilling mud.

Concrete as per approved mix design will be supplied from centralized batching plant for all piles. Slump test will be done to check the workability of Tremie Concrete & Concrete. The Concrete shall generally be poured with minimum interruption.

Grade, length, Dia.meter etc. shall be as per design requirement shown on relevant drawings. Concrete cover blocks to ensure proper concrete covering shall be tied to rings of the cage.

**Setting Out:** This shall be provided by the Client.

**Setting of Piling Rig:** Rig will be centered on pile point. Drilling will be carried out using auger/bucket to a depth of approx. 2 to 3 meters. Then a temporary MS casing for about 4 to 6 m (approx) length from the ground level will be driven to protect loose soil from falling in the bore hole at locations where the soil is in loose state and there is a tendency of collapse of bore hole. After driving the casing its verticality will be checked by plumb bob.

**Boring of Piles:** The excavation is generally performed by rotation using a rotary drill, composed of a rotary table.

**Borehole Stabilization:** During the entire operation, the pile bore will be kept stable with bentonite solution.

**Determination of Density:** The bentonite sample from the bottom of borehole will be collected and its density will be measured by Hydrometer having a range of 1.001 to 1.300 gm/ml.

**Determination of Marsh Cone Viscosity:** The viscosity will be determined by using cone apparatus.

**Reinforcement Fixing:** Pile reinforcement cage shall be fabricated as per the details given in drawing and Bar Bending Schedule.

**Flushing the Borehole:** After cage lowering is completed the bore will be flushed with Bentonite Flushing shall be done continuously with bentonite till consistency of bottom slurry becomes less than 1.20.

**Concreting:** Minimum time interval between the completion of boring and placing of concrete will be maintained. The gap between the bottom of the bore to the end of tremie pipe will be min 300mm. The Dia. of the tremie pipe will be not less than 200mm. The Tremie pipe shall be removed in stages during pouring of concrete ensuring that the Tremie bottom is always inside the concrete.

- **Manufacture of Reinforcement as per drawing**

Bar Bending & Cutting machines of required capacities would be set up in the Client's work yard inside a covered shed that would function as a reinforcement factory.

The factory will also be equipped with necessary tables for working, electricity, other tools as required and overhead EOT if so required.

Normally full length reinforcement bars would be procured by the client and issued to us.

Reinforcement will be cut, bend and manufactured to required lengths, shapes and sizes as per the approved Bar Bending schedule which shall be provided to us.

The reinforcement thus manufactured will be tagged off mentioning the length, drawing no, structure identification etc and will be stacked in a designated location for transportation to the construction site as per the schedule provided to us.

- **Preparation & Laying of Storm, Sewer and portable Water lines (With or without pipes)**

The Following steps are followed by us during the laying of Storm and Sewer water lines at deeper:-

- Fixing of Alignment in plan as per given drawings by Co-ordinate method.
- Soldier piles installation by Manual labour, TMR and DTH Machine in required Dia..
- Inserted the ISMB Girders in pile holes and back fill with 1:20 (cement : soil).
- Fabricated struts and walers before excavation in deep position beyond 3.5 meter.
- Excavation of trenches by JCB and Poclair.
- Leggings by wooden planks with excavated layers.
- Dressing of bed by manual labour.
- PCC or Sand Filling in Bed before Laying the Pipe.
- Placing of RCC humepipes by pick and carry crane.

- Joining of pipes in proper alignment by help of manual labour and crane.
- Joints Filling by mortar 1:6 (1 cement:6 coarse sand) with rubber packings
- Making of Manholes at given location and distances as per drawings.
- Houching by PCC or Sand filling around the pipe in minimum 150 mm thick.
- Back filling by selected soil in 250 mm thick layers with 98 % proctor density.
- Final finishing and restoration of roads, if alignment in running roads.

- **Fabrication & Handling of Barricades**

Barricade Boards, which demarcate the working area from the traffic movement corridor, would be fabricated, painted & marked as per the drawings and specifications. The fabricated barricade boards would be installed in position and locked.

Rehandling of barricades by lifting from the previously installed positions and placing at the new locations would be carried out as per the requirement of the client.

Maintenance, repainting and cleaning of the installed barricade boards would be carried out.

- **Any type of shoring works with contiguous, soldier and sheet piling with anchoring and shotcrete**

First installed Piling by TMR Machine as per required drawing and design on marked alignment after that execute excavation in steps and installed anchors at 20 degree from horizontal at required depth. Waler beam fabricated and installed with anchor rod on horizontally and fixed with wedge plates and bolts.

Shotcrete made on that soil faces which are highly alarmed as collapsed soil, 75 x75x4.2 mm mesh installed on soil face with nails, grouted by grouting pump as required grouting materials after installed the mesh.

**In conclusion**, we would be proud to be associated with you in your prestigious project / projects and would request you to spare some of your valuable time for an appointment with us where we can understand the total scope of work in detail. This would enable us to come up with a comprehensive techno-commercial proposal for the subject work.

As always, we promise state of the art equipment, transparent, honest and diligent service and a product conforming to schedule, budget and the strictest standards of quality and safety

## **MANAGEMENT PROFILE**

Proprietor: S. B. Gurjar (B. E. Civil & MBA)  
A2, RPS Omaxe Green valley, Sector 41-42  
Faridabad -121003

## **Proprietor – S.B.Gurjar**

In 2001 passed a civil Engineering Degree from Engineering College Kota Rajasthan with First division. & MBA from Delhi in 2010. From May 2001 working with different companies in different capacities as a civil engineer like –

**GM Civil & Proffit Partner** : (From 1st Oct 2012 to till Nov 2012).  
**Company** : **RV Akash Ganga Infrastructure Ltd.**  
**Location** : DMRC Project CC-23 ,Nehru Place ,Panchsheel , Houz khas  
**Responsibilities**: Total planning and management of front for Three Grab Rigs for D-wall activity, Related Drawings, Manpower, Staff,Cages making, Billing, Target achieving, for this 3 Nos. Underground station building Metro Project. Dealing with Client Pratibha industries Ltd. And Parrelel Controlling of whole RVAG Piling& D-wall projects, Contracts Division.

**GM Civil** : (From 1st May 2012 to Sep .2012).  
**Company** : **RV Akash Ganga Infrastructure Ltd.**  
**Location** : DMRC Project CC-10 & CC -11.Faridabad  
**Responsibilities** : Total planning and management of front for four rotary Rigs for piling activity ,Related Drawings ,Manpower , Staff ,Cages making, Billing, Target achieving, for this 8 Nos. station building Metro Project. Dealing with Client Lanco Infratech Ltd. And Parrelel Controlling of whole RVAG Piling projects, Contracts Division

**SR. PROJECT MANAGER** (From Feb.2011 to 31.03.2012).  
**Company** : **RV Akash Ganga Infrastructure Ltd.**  
**Location** : Rapid Metro Rail Project, Gurgaon.  
**Responsibilities** : Total planning and management of front for four rotary Rigs for piling activity ,Related Drawings ,Manpower , Staff ,Cages making, Billing, Target achieving, for this 6.5 kms Metro Project. Dealing with Client IL & FS Engineering services. And Parrelel Controlling of whole RVAG Piling projects , Contracts Division.

**PROJECT MANAGER** ( From Oct .2010 to Feb.2011).  
**Company** : **RV Akash Ganga Infrastructure Ltd.**  
**Location** : Rapid Metro Rail Project, Gurgaon.  
**Responsibilities** : Total planning and management of front for four rotary Rigs for piling activity ,Related Drawings ,Manpower , Staff ,Cages making, Billing, Target achieving, for this 6.5 kms Metro Project. Dealing with Client IL & FS Engineering services.

**PROJECT MANAGER** ( From Feb. 2009 to Oct .2010).  
**Company** : **RV Akash Ganga Infrastructure Ltd.**  
**Location** : Badarpur Flyover ,6 lane 4.45 kms.

**Responsibilities :** Total planning and management of front for four rotary Rigs for piling activity ,Related Drawings ,Manpower , Staff ,Cages making, Billing, Target achieving, for this 4.45 kms Highway Project. Dealing with Client Hindustan Construction Company Ltd.

**PROJECT MANAGER** ( From Nov. 2007 to Feb .2009).

**Company :** RV Akash Ganga Infrastructure Ltd.

**Location :** BC-26, DMRC Project ,Length 6.65 kms.

**Responsibilities :** Total planning and management of front for three rotary Rigs for piling,Pile-cap,Piers,Piercap ,launching of girders activity ,Related Drawings ,Manpower , Staff ,Cages making, Billing, Target achieving, for this 6.65 kms Metro Project. Dealing with Client Delhi Metro Rail Corporation Ltd.

**PROJECT MANAGER** ( From July 2007 to Nov. to 2007).

**Company :** RV Akash Ganga Infrastructure Ltd.

**Location :** BC-21, DMRC Project ,Length 2.25 kms.

**Responsibilities :** Total planning and management of front for one rotary Rig for piling,activity ,Related Drawings ,Manpower , Staff ,Cages making, Billing, Target achieving, for this 2.25 kms Metro Project. Dealing with Client ITD Cementation Ltd.

**CONSTRUCTION MANAGER** ( From Jan 2007 to July 2007).

**Company :** ITD Cementation Ltd.(BU3)

**Location :** BC-21, DMRC Project ,Length 9.25 kms.

**Responsibilities :** Dealing with subcontractors for Piling of whole 9.25 kms,arranging of vendors and subcontractors , piling progress responsibility.

**DY.PROJECT MANAGER** ( From Oct 2005 to Jan. 2007).

**Company :** Harish Chandra (India.) Ltd.

**Location :** Parwati Dam Canal Project Dholpur (Raj.),Length 72 kms.

**Responsibilities:** 72 km. canal lining project of parvati main canal from parvati dam in dholpur Rajasthan,Syphons,outlets,regulatory heads,major & minor branches,canal culverts & aquaducts with piling work etc made from bottom to top in all respects

**SR. ENGINEER** ( From Aug. 2002 Oct 2005).

**Company :** Harish Chandra (India.) Ltd.

**Location :** Bhopal –Sehore ,Length 45 kms.

**Responsibilities :** NHAI Road work from Bhopal to sehore six lane highway work execution ,testing, reporting to seniors& Piling work

Billing by autoplotter software ,complete major & minor bridges from bottom to top,earthwork,GSB,WMM,BT,WMM plant erection,100 tonn crusher plant erection etc. whole responsibility related to NH Project 45 kms.

**SITE ENGINEER** ( From May 2001 to Aug. 2002).

**Company :** DODSAL.

**Location :** Chikli Valsad Gujrat,Length 80 kms.

**Responsibilities :** NHAI Road work execution 80 km. road project in chikli valsad Gujrat. Density of test,layers control,front- planning & Achieve availability of compaction for next front.
